

## ***Medical Personal Statement Pack***

***Your personal statement is your badge, your identity card, and your ticket to your interview. This is an important step in the application process and you want to make sure you stand out from the crowd!***

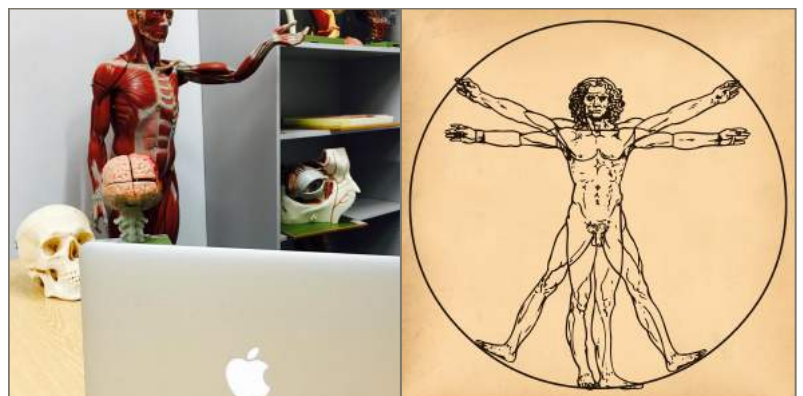

Through this online course, we will uncover all of the questions above and many more. The course starts with a face-to-face session via our online classroom where we deliver the theory behind a perfect personal statement. During this session we will explore your ideas, help you create a rough template, and give structure to your Personal Statement. Sometimes it's about **HOW** you write and less about **WHAT** you write about! For this reason, we aim to provide several resources, including good and bad examples, lists of powerful words and vocabulary, and background reading to assist you in writing the perfect Personal Statement.

From here, we meet up online for another hour, in a couple of days, to see how you get along. During this time, we will review your draft, and offer personalised feedback and suggestions for your Personal Statement. Your Personal Statement will be assessed by at least two medical students and/or doctors.

We conclude with a final 1 hour session where we aim to review the final version of your Personal Statement, offer personalised feedback and ultimate suggestions, and answer any questions you may have.

***“Wherever the art of medicine is loved, there is also a love of humanity”***

*Hippocrates*

## What's included in the pack?

- **One-to-One sessions with a medical student or a doctor (Total 3 Hours Online)**
