

Online UKCAT Pack

Want to hear the biggest lie ever? “You cannot prepare or revise for the UKCAT!”

Don't let anyone tell you it is impossible to prepare for the UK Clinical Aptitude Test (UKCAT). While it is true that the UKCAT does not include any science content, everything that has the word “test” in its title can be revised for! You may not be able to revise the exact content of the test, but you can at least get used to the format. Practice enough sample questions until the so called test that you cannot prepare for becomes second nature to you.

With 27 UK medical and dental medical schools using the UKCAT as an entry requirement, it is essential to get as much exposure as possible to the style of assessment used during the test. As part of our continuous efforts to widen access to medicine, we have developed a branch dedicated to preparing students to succeed in UK admissions tests, such as the UKCAT and BMAT.

Our pack is designed as a fast-track UKCAT course and includes three* one-to-one tutoring sessions with a medical student or a doctor delivered online.

We start with a 1 hour face-to-face session uncovering the UKCAT and its subsections, information on strategy, technique, and key tips. After you have consolidated the theory delivered during our first session, we put this theory into practice by using interactive sample questions and examples.

Our final face-to-face session will include a mock test. During this session, you will have the opportunity to use the strategies and techniques learnt during previous sessions and provide a rationale for each decision you make. Specific feedback will be provided at the end of the session. Each student will also receive a booklet of further sample questions. Rather than focusing on quantity, we aim to uncover quality strategies and techniques that can be used when practicing further questions. There is no secret to the UKCAT; Practicing thousands of questions with the right techniques can help you succeed.

What's included in the pack?

- **One-to-One sessions with a medical student or a doctor (Total 3 Hours Online)**
 - 1 hour online Introduction and Theory Session
 - 1 hour online Strategies, Techniques, and Hands-on Sample Questions
 - 1 hour online Mock UKCAT Test
- **Resources and Background Reading**
 - Reading list and preparation materials
 - Evidence based materials developed in collaboration with UK tutors
 - Booklet of questions including sample questions from each UKCAT subsection
- **Specific Information regarding the UKCAT cut-off scores**
- **Personalised feedback and suggestions for improvement**
- **Common test techniques and what to expect on the day**

Our medical students and doctors are looking forward to joining you in your application journey. Remember, we are here to help and to support you until you succeed.
